FAQ's for Selling, Recycling & Disposing of Decommissioned IT Hardware.

FAQ'S ABOUT WHERE AND HOW TO DISPOSE OF OR RECYCLE OR SELL DECOMMISSIONED SERVERS & IT HARDWARE?

Over the decades our ITAD company has received literally thousands of emails and phone calls from potential clients asking questions about our services. On occasion, a question will be extremely unique, such as: "does magnetic degaussing work on SSD", the answer to this BTW is not very often. We thought it might be fun and hopefully helpful to list the most common questions asked. So, the team and I put our heads together, debated, read through a zillion emails and spent ours by the coffee machine talking about the most common questions we get asked.

After 'much to do' and hours of exhaustive coffee drinking, we compiled the definitive list of frequently asked ITAD questions.   In total we narrowed it down to a slim, minuscule number of a mere 32 questions. THAT'S RIGHT, 32! Most of the questions are very similar, like: "do you recycle or buy used servers", answer: "yes we do", next question: "but to you recycle or buy used HPE servers", answer: "yes, all servers", question: "even Cisco UCS Servers", reply: "yes all servers". I could go on but to spare you from that I give you 32 of the most glorious, mind blowing, time saving ITAD FAQs ever asked, I should also add, if you have any questions that aren't on this list, please email them to support@itad-company.com, hope these FAQs help:

1. Do you buy used servers?

Yes, we purchase decommissioned servers from offices and data centers. We do not buy personal computers of any kind. If you want to sell second hand servers our ITAD company purchases Dell servers, HPE servers, SuperMicro servers and Nutanix servers. We buy used rack, blade and tower servers and we are always interested in helping you to decommission, remove, recycle and sell racks of server equipment. For more information or a quote please email or call us today.

2. Do you buy used IBM machines?

Our ITAD company will purchase or recycle used IBM computer hardware such as IBM servers. If you need an IT disposal company specializing in data center and office IT decommissioning our ITAD company can help? For more information or a quote please email or call us today.

3. Do you buy used network hardware?

If you are looking to sell your decommissioned network hardware we will tend to buy retired switches and network hardware made by Brands like: Cisco, HPE Aruba, Dell PowerConnect, Juniper, Arista, Alcatel, Brocade, Extreme, Mellanox, SonicWall and Ruckus. If you have network equipment made by anyone else, we are always interested in hearing from you. Please email or call us today.

4. Do you buy used data storage systems?

Selling used data storage systems with drives usually requires professional disk erasure. Our ITAD company provides both drive wiping and shredding services. In addition, if you want to sell your used data storage systems, we mainly purchase the following brands: Dell EMC, IBM, Oracle, HPE and Net App. If you are interested in selling retired data storage systems from office or cloud environments, please email a list of your storage devices to us or use the form on our website.

5. Do you provide data center decommissioning services?

Our data center decommissioning service supports both small projects such as server cluster removal and large projects such as clearing out an entire hyperscale data center. The service includes an equipment audit, dismantling, packaging, removal, storage, equipment testing, refurbishment for reselling or redeployment, recycling and digital data destruction (hard drive wiping or shredding). If you have any special requirements or would like to contact us, please email us today.

6. Do you provide IT decommissioning for office networks?

Our ITAD company is able to help with the dismantling and removal of office computer networks. If you want to remove, recycle or sell business IT hardware, computers, laptops and IT office equipment please contact our ITAD support team. We mainly recycle or buy used business computers such as: servers, desktops, laptops, pads and smartphones.

7. What type of servers do you recycle and buy?

We recycle and buy all types of used & new server types, such as: proxy servers, mail servers, web servers, application servers, FTP servers, real-time communication servers, and data base storage servers. If you want to recycle or sell decommissioned rack servers, tower servers, modular servers and vSAN servers, we can help. We accept all the leading brands, typically back to Gen 10 on up.

8. What are the fees for data center hardware decommissioning?

The cost for decommissioning data center servers, storage and network hardware is usually zeroed by the resell value of the servers, storage systems and switches. High value items for resell, such as a data centers Dell and HPE servers, Cisco, Aruba, Dell PowerConnect, Juniper, Arista network switches can cancel out the cost of removal, recycling and even digital data destruction (drive erasure through wiping or shredding).

9. Do you remove ancillary data center equipment?

Usually, our office and data center decommissioning service includes the removal of docking stations, UPS, keyboards, racks, rails kits, power cords, cables and cabinets. Disposing of replaced IT infrastructure such as retired; rack servers, rack data storage and rack networking equipment also requires a measure of flexibility. For example, we might discover otherwise unlisted ancillary computer hardware that may well also require removal and disposal.

10. Do you buy used company laptops?

If you are looking into selling used or decommissioned company laptops our ITAD company might buy them. We remove, recycle or buy second hand company laptops from data centers, businesses, academic institutions, governmental departments and the US military and intelligence agencies throughout the USA. It is important to mention, we also provide digital data destruction (hard drive wiping or shredding) for company laptops.

11. Do you buy use business computers?

If you are looking into selling used or decommissioned business computers our ITAD company might buy them. We remove, recycle or buy second hand office pcs from data centers, businesses, academic institutions, governmental departments and the US military and intelligence agencies. It is important to mention, we also provide digital data destruction (hard drive removal, wiping or shredding) for business computers.

12. Do you buy used rack servers?

If you are looking into selling used or decommissioned rack servers our ITAD company might buy them. We remove, recycle or buy second hand rack servers from data centers, businesses, academic institutions, governmental departments and the US military and intelligence agencies throughout the USA. It is important to mention, we also provide digital data destruction (hard drive wiping or shredding) for rack servers.

13. Do you buy decommissioned blade server?

If you are looking into selling used or decommissioned blade server our ITAD company might buy them. We remove, recycle or buy second hand blade server from data centers, businesses, academic institutions, governmental departments and the US military and intelligence agencies throughout the USA. It is important to mention, we also provide digital data destruction (hard drive wiping or shredding) for blade server.
